[SAP Business One](#)
[SAP Business One Extensibility](#)

Hi all,

Today, I would like to share with the community a list of object types of SAP Business One.

On the community there is a lot of questions about object types and many post with object types list, but always it seems incomplete.

So, the purpose of this post is share this information and create a knowledge base about object types.

If you know some object type that is not presented on this list, please leave a comment on this post, then I will update this list.

Table	Table description	Primary Key	Object Type
OACT	G/L Accounts	AcctCode	1
OCRD	Business Partner	CardCode	2
ODSC	Bank Codes	AbsEntry	3
OITM	Items	ItemCode	4
OVTG	Tax Definition	Code	5
OPLN	Price Lists	ListNum	6
OSPP	Special Prices	CardCode, ItemCode	7
OITG	Item Properties	ItmsTypCod	8
ORTM	Rate Differences	LineNum, IsSysCurr	9
OCRG	Card Groups	GroupCode	10
OCPR	Contact Persons	CntctCode	11
OUSR	Users	USERID	12
OINV	A/R Invoice	DocEntry	13

Hi Adolfo,

Where did you see this object type? You know about what screen of SAP Business One this object type is related and what is the version of SAP

Business One you saw this object type?

Kind Regards,

Diego Lothar

Hi Diego, thanks for your contribution

Somebody knows an HANA query for retrieving all the "Object Type" list?

Thanks in advance.

Former Member

2017 Aug 25 4:58 PM

Hi Tommaso,

The object types are the same on SQL or Hana. I unfortunately believe there is no way by query, to retrieve a list of Object types. I did this list based on SDK documentation and a lot of hard work.

Kind Regards,

Diego Lothar

Hi Divyesh,

Unfortunately there is no table on SAP Business One with this information.

Kind Regards,

Diego Lothar

Hi Diego,

There are two new objects in SAP Business One 9.3.

They are 'Return Request (ORRR)' and 'Goods Return Request (OPRR)'.

Hope you can update the list.

Thanks for your effort.

Hi Diego,

Thanks for information. Its really helpful. Can we create a custom object type and assign a custom table to that object type ?

Thanks,

Prakash

The first screenshot shows the "User-Defined Tables - Setup" dialog box. It contains a table with columns: #, Table Name, Description, Object Type, Archivable, and Archive Date. The table has four rows:

#	Table Name	Description	Object Type	Archivable	Archive Date
1	ACO_ATT	Attachment Control	No Object	☐	
2	ACO_FILE_PATH	File location	No Object	☐	
3	ACO_PAR	Parameters	No Object	☐	
4			No Object	☐	

A red number "1" is placed below the table. At the bottom are "Update" and "Cancel" buttons.

The second screenshot shows the "User-Defined Object Registration" dialog box, specifically the "Defining Basic Settings" tab. It contains the following fields:

- Unique ID:
- Name:
- Type: (dropdown menu)
- Table Name:

A red number "2" is placed to the right of the "Type" field. At the bottom are "Cancel", "< Back", "Next >", and "Finish" buttons.

For example, I'm trying to add a Resource via SDK, but I only found that the object type for Resources is 290 on this page.

Then, when I use it in C#, it brought all the Properties of this object, so, Success.

BUT, it doesn't brought the GetByKey, so I'm helpless trying to modify na already existing Resource.

Does anyone have any solution on how to get a Resource in SDK?

Best regards,

Arão Benjamin

Hello,

I always rely on this useful guide.

Please, where can I find a table in SBO in order to display automatically in SQL query the correspondent name for the Object Id?

Thanks in Advance

Hi Diego,

What is the object type of **EmployeeAbsenceInfo (HEM1)** ?

m_felicella

Participant

2020 Nov 20 11:32 AM

The number associated with the object type refers only to the parent. To access the children you have to open the father (171) in your case and update all the children. Do you need it with SLIDES or Service Layers?

former_member183402

Participant

2020 Nov 20 12:04 PM

I'm using DI API

What I want is to add data of Absence to the Employee data

Below codes add Employee first and last name successfully

```
1 $oEmp=$mycomp->GetBusinessObject(171);  
2 $oEmp->firstName="Schadrack";  
3 $oEmp->lastName="Rurangwa";  
4 $oEmp->Add;
```

But I tried to add Absence data to the employee I failed, I tried below codes

```
1 $oEmp=$mycomp->GetBusinessObject(171);  
2 $oEmp->firstName="Schadrack";  
3 $oEmp->lastName="Rurangwa";  
4  
5 $oEmp->lines->Add;  
6 $oEmp->Lines->fromDate="2020-11-15";  
7 $oEmp->Lines->toDate="2020-11-20";  
8 $oEmp->Add;
```

The confusion I have is, I don't have the reference which will separate Absence table with other tables for example Education, Reviews and so on

Please anyone can help me

Try this sample:

C:\Program Files (x86)\sap\SAP Business One SDK\Samples\COM DI\CSharp\05.order

Thanks for Guide, my 5 cents:

234000032 - Goods Return Request (AP Side) Table OPRR

Hello diego.lother

Thanks for the post!

You might want to add this one, too:

- 10000013 - Unreported VAT transactions - Table OUTX

Thanks!

Joerg.

Hi. Anyone knows the object 1470000454?

We received the following response from DI-API after trying to insert a purchase request (1470000113/OPRQ 🙄)

"Exception : DI Error: (-5002) 1470000454 - Specify the e-mail address [OPRQ.Email]-The di call #1 did fail."

Is there a table in the database that contains the same data?

Hi Diego,

What is the object type of Timesheet form which is under Human Resources module in SAP B1 9.2 PL10?

hi,

can someone explain to me please where i can get the object id for return request ORRR. the comment above seems to be for the return ORDND, not for the return request:

petljub

"You can easily get this information for Marketing Documents, etc. by looking at entries added to the header table. The table for the RMA (Return Request) is ORRR and the Object Types are written to the ObjType column, in this case 234000031."

also, i'm not sure what you mean Peter by looking at 'entries to the header table'. i'm a bit new to this. what does this mean? do you mean system info? that doesn't seem to match up with the other numbers Diego has on his list...

thanks

ruth

Hi Ruth

Only saw this post now, if you are still needing assistance, `SELECT DISTINCT ObjType FROM ORRR` will give you the info. If you run `SELECT DISTINCT ObjType FROM OINV` it will return 13 for example.

Kind regards

Peter Juby

I think that people getting here might be interested in this open source repository containing this information in a JSON format.

Using github API, you (or your application) can consume this content dynamically via an API call, and filter based on your needs.

You are welcome to contribute and add new data types by submitting a PR, and maintaining it's content up-to-date.

Dear Diego Lothar,

Thanks a lot for very valuable information. But what about table field definitions?

Regards,

Mucip:)
